508·719·8406

## Languages and tools

Proficient in HTML, CSS, Sass, Bootstrap, Javascript, jQuery, Python, and PHP with a background in MySQL,AngularJS, C/C++, Java, C#, and Objective-C. Experienced with Grunt, Bower, SVN, and Git.

## Attributes

A natural leader with clear communication skills and the dedication to succeed. Constantly looking to improve myself, my work, and to grow by learning from others. Creative and artistic. Coding is an art after all!

## Relevant Work Experience

### Endicia                          *Contractor*                Palo Alto, CA              March 2015 - Present
- Redesigned the current company administrative site to improve overalll site navigation efficiency.
- Used Bootstrap-Sass and AngularJS to develop page templates with a focus on unifying UI and UX.
- Compiled templates into an intuitive website meant to aid the dev team during the creation of a new administrative site.
- Currently implementing functionality with AngularJS that will later tie seemlessly into the backend framework.

### Bit9                          *Software Engineer Intern*            Waltham, MA              May - August 2014
- Proposed and created a web application (HTML and CSS) for visualizing states assigned to cert. auths. by the Bit9 product.
- Wrote PHP talked with the SQL database to display real certificate information and even modify test certs on the fly.
- Improved SQL certificate state test suite with a set of fifty new, unified tests complete with thorough documentation.

### Infor Global Solutions              *Software Engineer Intern*            Portsmouth, NH            May - August 2013
- Worked with QA team to search manually through the product and report bugs in UI and functionality.
- Additionally worked with the product development team to prepare for a new build release.
- Resolved numerous pervasive issues and touched hundreds of files in the process.

### Community Healthlink              *Website Administrator*            Worcester, MA          Sept. 2012 - May 2014
- Created new pages, menus, and modules with Joomla CMS in preparation for a completely new site release.
- Maintained the site after the succesful unveiling by periodically updating content and fixing bugs in the Joomla template code.
- Visit communityhealthlink.org to see the website
